Glenmark in talks for licensing deal for cancer drug candidate ISB 2001

BIG MOVE. Pharma major also looking to make diabetes, weightloss drug semaglutide for India

PT Jyothi Datta
Mumbai

Glenmark Pharmaceuticals is in talks with global drug-makers for a licensing deal on its ISB 2001 drug candidate being developed for use in the treatment of multiple myeloma, top executives with the drugmaker said, outlining growth plans that included making diabetes and weightloss drug semaglutide for India.

IN DISCUSSIONS

The company is in “advanced discussions with multiple partners, all big pharma partners,” Glenn Saldanha, Chairman & Managing Director, Glenmark Pharmaceuticals Ltd (GPL), told analysts, adding that a “positive outcome” could be expected soon.

“We think a deal for (ISB) 2001 will really be transformational for Glenmark. And it will overshadow anything else that we are doing in the near term... You should see some visibility around a licensing deal pretty quickly,” he added.

ISB 2001 is part of the innovative pipeline of Ichnos

A deal for (ISB) 2001 will really be transformational for us... It will overshadow anything else that we are doing in the near term

GLENN SALDANHA
CMD, Glenmark Pharmaceuticals Ltd

Glenmark Innovation (IGI) — an alliance between Glenmark’s US-based biotech subsidiary Ichnos Sciences and GPL — that had received the US Food and Drug Administration’s fast-track designation this month, as a treatment for patients with relapsed/refractory multiple myeloma. Two of GPL’s drug candidates in immunology have already been partnered out — ISB 880 and ISB 830.

Giving details on ISB 2001, a company official said that it is among the first trispecific antibodies developed for use in multiple myeloma. It received orphan drug designation from the FDA in July 2023, besides the recent fast track designation, as a treatment for patients

with relapsed refractory multiple myeloma, “specifically patients who have received 3 or more prior lines of treatment.” IGI will also be presenting data on this candidate at the upcoming American Society of Clinical Oncology (ASCO) conference in a few days.

EYES OPPORTUNITY

Glenmark is also throwing its hat in the opportunity that opens up when semaglutide, the popular diabetes and weightloss product, goes off patent next year. Industry peers, including Cipla, Lupin and Mankind, have stated their intent to participate in this opportunity for the drug, popular globally by its brand name Ozempic/

Wegovy. Novo Nordisk, the maker of Wegovy (the injectible drug) is expected to bring in this product shortly. The oral version of semaglutide already sells in India.

SWISS FACILITY

Meanwhile, Glenmark pointed to IGI’s announcement in March and said all its clinical supply manufacturing at its facility in La Chaux-de-Fonds, Switzerland, would cease. “As IGI is progressing its pipeline, it is anticipated that higher quantities of finished product will be required for future clinical programmes and IGI CMC (chemistry, manufacturing, and controls) development and ongoing future clinical programmes — manufacturing of ongoing clinical programmes will be moved to a network of well-established global contract development and manufacturing organisations,” the representative said. The development comes 10 years after this facility was opened — to supplement Glenmark’s existing in-house discovery and development capabilities by supplying material for clinical development, the company then said.

Arvind eyes ₹475 crore capex for FY26

Avinash Nair
Ahmedabad

Arvind has pledged a capital expenditure of an estimated ₹475 crore for FY26, as the company targets to ramp up its garment manufacturing capacity to 60 million garments within one-and-a-half years.

INDIA-UK FTA DEAL

The company felt that the India-UK FTA deal would help it “re-balance” its dependence on the US market.

“I think another watershed event, the signing of the FTA (Free Trade Agreement) between India and the UK is important, especially for the textile and apparel business.

“India will become an interesting sourcing destination for the UK.

And it will also benefit Arvind quite significantly in securing the right kind of re-balancing to US dependence,” said Punit Lalbhai, Vice-Chairman, Arvind, during a recent earnings call.

He said that the company will use the opportunity provided by the FTA to “put more resources behind developing the UK market”. Despite the uncertainties continuing to surround US tariffs, he said that there was a robust demand scenario in that country.

“We are still going to remain heavily indexed on the US, as all our customers even there are only talking about increasing business than decreasing business.”

90-DAY US TARIFF-PAUSE
He added that the 90-day US

tariff-pause had led to advancement of orders.

“There are a few pre-pone-ments because people want to lock-in their prices until the window of certainty exists.

So, that’s leading to capacity imbalances as well. The

situation is a little chaotic compared to normal times,” he said.

The company currently has an annual garment manufacturing capacity of 40 million, which is expected to be scaled up to 50 million by the current fiscal-end.

Mapmygenome enters US market through acquisition of Microbiome Insights

KV Kurmanath
Hyderabad

Mapmygenome, an AI-based genomics and personalised health solutions provider, has acquired the Canadian microbial sequencing company Microbiome Insights for an undisclosed consideration.

“The acquisition gets us access to its CAP (College of American Pathologists)-accredited laboratory set up by the target company. It will help us tap the US market. We will introduce its integrated genomics and microbiome testing services to North America, making holistic, data-driven health solutions more accessible,” Anu Acharya, Founder-Chief Executive Officer, told *businessline*.

INTERNATIONAL ACCREDITATION

Laboratories have to undergo a rigorous accreditation process by the CAP to ensure that they meet high standards in laboratory testing and operations. This accreditation is recognised internationally.

“The human microbiome is pivotal to health, and this acquisition positions us as a leader in this area. We gain exceptional expertise in meta-genomics, transcriptomics and targeted metabolomics to serve academic, biotech and clinical sectors,” Acharya said. “The combination of their expertise in AI-driven genomics solutions and our deep microbiome expertise will result in a new standard of cutting-edge services for clients,” Malcolm Kendall, CEO, said.
